

# Warmex® Insulating Glass

Warmex® Seals and Spacers for Insulating Glass represent a break-through in Insulating Glass performance.

An optimised combination of an attractive metal spacer design with flexible and efficient gas sealing and thermal break insulation.

## **We offer**

Licenses to manufacture and Market  
Sealed Insulating Glass Units  
with Warmex® Seal

## **Benefits**

Use together with traditional metal spacers

Improve sealing against gas leak up to 20 times better than required by EuroNorm EN 1279-3 for insulating glass with gas.

Works with structural glazing with silicone bonding making also this type of glasunit gas tight to EN 1279 – 3.

Improve edge insulation whereby reducing condensation still using metal spacer.

Combines also with Nordicon Blind IG.
